

SuccessWare 6.0.3 Release Notes

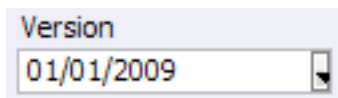

Systems No Longer Supported

- Systems prior to Windows XP Service Pack 2 are no longer supported (which includes Windows 2000).
- Mac OS X 10.3 “Panther” is no longer supported.
- Mac OS X 10.4 “Tiger” prior to version 10.4.11 is no longer supported.

Known Issues

The following issues will be resolved in a future release:

- Authentication windows asking for the user’s password may appear when printing or displaying help for the first time on Mac OS X 10.6 “Snow Leopard.”
- External reminder window does not appear on Mac OS X 10.4 “Tiger.”
- Appointment searching is disabled.
- Pop up menus do not appear properly on Windows 7. Their right sides are cut off and they look like this:

Enhancements

- Added the ability to log email transmissions to aid debugging SMTP server connections.

Resolved Issues

- Resolved a problem that caused SuccessWare to crash when Insert Field was selected in the email and letter editors.
- Resolved an issue where the start times of upcoming appointments inserted into emails and letters could be in the wrong order for multiple appointments.

- Resolved a display issue where the Schedules or Work Hours lists would appear in list view even though lists were hidden.
- Resolves an issue that kept the auto email "To" pop up menu from being refreshed when the client was changed on session forms.
- Resolved an issue which prevented the help guide from displaying on the server in multi-user.
